Don't waste your money. Even at bargain prices the game is dumb.. Great 4X-Game. If you ever wanted a SoaSE Sequel, here it is!. Continuation of the series. There are still many different locations and interesting mechanics. Added new features, for example, a first-person view. Still delicious for fans of the genre of shooting zombies.. pretty good game. Ah there we go. Now i can leave a review xD

I absolutely love this game, the community is great and it's a great game to either play with friends OR random online people~ I recommend this came to anyone who loves mario-party like games. I already put around 700 hours into the game~ <3.
DISAPPOINTMENT

1. Matchmaking sux:

- joining to match where opposite players have much more higher level,
- play 1 vs. 3.

2. Character is not learning, after few turns accuracy from 85% went to 56%.

3. Sniper class miss the target when has 100%.

4. Field of Fire Cover is on the whole team but the sniper:

- is not covering all team mates,
- is not shooting to all enemies in shooting range,
- miss over 75% of his shoots.

5. Few items to craft and buy in the shop.

6. Where are the maps which I saw in the game trailer ?

7. Devs are deaf,

8. Discussions are dead.. Basically space ship maintenance simulator. Stupid fun for such a simple game. I always wanted to be Geordi or O'Brien and this game hits that fantasy.. Hello, I must apologies for this is my first ever review.

I have reached pretty far in the game, I will update my review on completion of the game.

I barely got myself a Mixed Reality headset and was looking around the steam store when I came across this game before release and thought this would be a pretty neat game. Compared to all the other games on steam at the time and now I still think this game is one of the most well made on the steam market right now!

So the game is a simple puzzle\platformer and as you progress thru the game the puzzles become more difficult and rewarding with very little to no hand holding\tutorials form the game. As you progress thru the game you will have little interactions with

the little princess as she wishes to reach the top of the tower. Best way I could describe her is that she is a spunky princess thinking she can get up the tower all by herself.

The game mechanics are crisp, clean and responsive. Be aware, for players that are starting out the game. Applying any pressure on the touch pad activates the light making the princess move. I learned this the hard way and had my thumb rest on it almost the entire time making simple puzzles more difficult than they necessarily needed to be. The problem with the controls can be that if you're not careful you could accidentally fall off the side of the cliff if you aren't aiming just right.

I think what pleased me the most is that some puzzles can be solved in multiple of ways when you start thinking outside the box and realize that you are playing in a 3D environment and that you can manipulate that environment to better help you solve the puzzle even if it wasn't intended to be solved that way. The music is fun and fitting for the puzzles and I couldn't stop grinning ear to ear when one particular song started to play on one of the puzzles. I will let you guess which one it is!

The evolution of the platforming Genera with VR is amazing in this game and is definitely should be the first game you should experience when playing VR! The puzzles can be difficult but fills you with a load of achievement when you discover a solution for yourself!

The only downside is the model of our main protagonist and how her cloths keep clipping thru her other than that. I would give this game an 8/10 a must try for those who are barely starting to play VR games and a fair price for a fun experience!

The investor is haunting my dreams now.. Abandonware. Its been around for a while.. But its still an awesome game.. Amazing modeling tools, texturing is nice too. But we need sizing object, layers and a decent export tools with texturing.

Keep dooing the good job guys.. Pro's:

- Full of lame jokes ("You remind me of my last girlfriend. All mouth, no action!")
- "Holy" Cow sensei has a Punjabi accent

Con's:

- Way too easy (except for the last level, which is a bit hard because of the camera/control issues)
- Only 5 levels - which can be completed within 10 minutes each.
- Repetitive enemies
- Terrible camera/controls
- Port from a mobile game
- No replay value

Then why I still recommend it? Well - because you must reach your ninjaness too, bro.. A game where you shoot balls into the bosses mouths. Why wouldn't you like it?. Simply and easy to learn.. Not as good as Steredenn. Has an upgrade system for guns, but no feedback on which ones are useful. Fiendishly hard, not because of good design, but because of oversensitive controls. Very unforgiving, but not in a good way.. Made me kill my whole family.
good game 10/10

Update to 1.1.0:

Very nice upgrade indeed.

- **Translated to JAPANESE!**

- **Better game performance**, older computers can play this game better.

- **Retro Mode added**. Reach level 51 and you should find it in options from the main menu.

- **Benchmark improved** but, we are aware that going through the benchmark more than once it will return worst scores.

- **Better particles system and graphics**: It all looks tidier: now instead of lines we have smoke and fire coming out the vortex. We can display even more particles at lower processing cost.

- Added: Warning to Asteroids field.

- Gamepad rebinder fix.

- Some other small fixes. **Upgrade to 1.1.6:**

New exciting upgrades:

- Now fully compatible with Steam's Big Picture
- Faster game-play overall
- Some performance and graphic upgrades
- Retro Mode enabled (fix)
- Extra credits (to play more)
- Small multi player difficulty game-play balance fixes
- Some typos corrected

-
- Better tutorials
 - Small navigation fixes

Retro Mode. **Patch 1.0.8:**

Hello everybody,

We have updated again Vortex Attack!

Enjoy the free and better contents!. Patch 1.2.2:

Hey we did it again. We realized that online scores system would only work for 2015 so we were forced to update the game once again...

So we used it as an excuse to improve a few things. Yay! 🤖

🔦 **We added button tags.** We were very surprised that not many people played the FREE TOURNAMENTS. Which is strange we as have very cool prizes and very enjoyable game modes. Maybe people didn't know about them as it didn't say anywhere the word "TOURNAMENT".

🔦 **Gameplay: Sectors 2,3, 4 and 5 are more interesting to play.** Before they used to be, for some players, stages that they had to go through to get to the real fun game, for expert players they weren't much of a challenge.

🔦 We also made **some small tweaks in the power-ups system** .

🔦 We **updated** some vortices' **graphics** and some really tiny tweaks in player ships.

🔦 **RETRO MODE:** It has been made more accessible and authentic.
We added the retro mode button in the main menu. Previously it was hidden in options.

Note about this mode:

"Retro mode" in Vortex Attack changes the textures, transitions between stages, removes all modern hints and changes other effects.

It changes the feeling of the game but, in reality, the game-play remains the same as the non-retro. So you can play and score for hi-scores or tournaments.

👤 Beware! We will find a bug somewhere and we will end up upgrading again. Until then.... have happy blasting away all those minions and scoring high! 🤖. **Version 1.0.2 PATCH upgrades.:**

With this new version, we have improved:

- **Game performance** game remains playable in lower specs.
- **Power-up system** thanks to the feedback from some reviewer.
We don't want luck to take a big part on this game, powerups are more suitable for each level and better distributed.
- **Level 42 mothership.**
We noticed some of you got stuck there. We made it slightly easier but don't expect a walk in the country side.
- Improved special **ships (plus) graphics.**
- Improved **scoring system:** now bonus are not going to give you super high scores.

-
- **Fixed lumergy and 1CC achievements.**

- Other smaller issues

Please let us know if is there anything else to fix, if you can find any!

Enjoy & Thanks for playing!
